

Battery Gang Charger

The JAMAR Gang Charger is designed to simplify the task of maintaining the 6 volt rechargeable batteries used in automatic traffic recorders. With this unit you can charge up to six batteries at the same time. In addition to charging your batteries, a built-in voltmeter allows you to check and monitor the voltage level of the battery. This will help you detect a failing battery before it goes into the field.

While the batteries are being charged, an LED on the front panel shows at a glance the state of each battery. A dark LED indicates the battery is being charged. A bright LED indicates the battery has been charged and the Gang Charger has gone to a float condition. This means that the Gang Charger will not overcharge the battery.

The JAMAR Gang Charger will charge any of the 6 volt rechargeable batteries used with TRAX data recorders, including the TRAX Mite, TRAX Mite Plus, TRAX I, TRAX I Plus, TRAX RD, TRAX RD Plus, TRAX II, TRAX III and TRAX III Plus. The Gang Charger comes with a standard warranty and full technical support.

- **Charges Six Batteries**

- **Monitors Voltage Levels**

- **Displays Charge Status**

- **Protects Against Overcharging**

Specifications

- **Size:** 11" x 8.5" x 4.5"
- **Weight:** Approx. 5 pounds
- **Interface:** Six charge ports
